

Course Syllabus Academic Writing 101

The University of Iowa
The College of Liberal Arts and Sciences

Delivery Format

This course will be delivered through asynchronous modules via ICON. Students are expected to learn each module and complete assignments by 11:59 pm on Sundays.

Course Instructor

Primary instructor: Ryota Numao

Email: ryota-numao@uiowa.edu

Office: Phillips Hall 566

Office Hours: Monday to Friday 9:30 am -10:10 am

Aside from these hours, please feel free to email the instructor.

Course Supervisor: (name deleted)

Email: (name deleted)

Office and Office Hours: (name deleted)

Department Executive Officer: (name deleted)

Email: (name deleted)

About the Course Instructor (read as needed)

I am a first-generation graduate student pursuing my M.A. in Learning Sciences and Educational Psychology at the University of Iowa. I received a Bachelor's degree in Human Sciences from Waseda University, with a focus on Cognitive Science and Education. Throughout my coursework and teaching experiences, I have gained the ability to apply psychological findings and strategies to educational practices both as a designer and educator. Currently, I am interested in how learners' epistemic affect—feeling during learning—formulates their domain-dependent academic self concept.

Required Reading Materials

There are two required textbooks for students whose first language is English:

- Bailey, S. (2021). *Academic Writing for University Students* (1st ed.). Routledge.
(ISBN: 9780367445393)
- Hayot, E. (2014). *The Elements of Academic Style: Writing for the Humanities*. Illustrated Edition. Columbia University Press. (ISBN: 9780231168014)

There are two required books for students whose first language is not English:

- Bailey, S. (2017). *Academic Writing: A Handbook for International Students* (5th ed.).

Routledge. (ISBN: 1138048747)

- Hayot, E. (2014). *The Elements of Academic Style: Writing for the Humanities*. Illustrated Edition. Columbia University Press. (ISBN: 9780231168014)

These books are available for purchase online. Hayot (2014)'s pdf is available through online access to University of Iowa Libraries for free.

Course Overview

This course is primarily designed for undergraduate students (especially in freshman and sophomore years) who have not learned collegiate-level academic writing. The main objectives of this course are to help students acquire collegiate-level academic writing skills and apply them in their own disciplines. To this end, emphasis is on the procedures necessary in a series of writing processes (Identifying the audience, outlining, information gathering, paragraphing etc.). In addition, given the recent trend of the generative AI use in academic writing, this course addresses ethical and responsible use of AI as a supporting tool. During the first three weeks (weeks 1 through 3), students learn the preparatory steps before starting to write, including identifying the audience, outlining, and information gathering. In the following six weeks (weeks 4 through 10), students learn drafting, argument, paragraphing, its analysis, and concluding. Following that, students learn the ethical and responsible use of generative AI as a writing tool (week 11 & 12). Building upon learning thus far, students analyze the standard of their (would-be) major field, based on the materials of their own choice (week 13 & 14).

Course Objectives

After completing this course,

1. Learners will be able to understand the preparatory steps before starting to write.
2. Learners will be able to craft well-organized documents required in college writing.
3. Learners will be able to use generative AI as a supporting tool for writing ethically and responsibly.
4. Learners will be able to apply fundamental academic writing principles in their own major fields.
5. International students whose first language is not English can write well-organized academic report in English.

Weekly Open Discussion Assignments

In almost all weeks, students are expected to make a post in response to discussion prompts via ICON. Discussion prompts are aimed at fostering your understanding of the weekly topics and deepening your thoughts by personalizing/applying them. After posting, reply to other students' post with respect. In your reply, constructive feedback or extending questions are encouraged. Instead of simply agreeing, you need to be critical or curious about other's ideas. Your post and reply are due Sundays at 11:59 pm for each week. Note that open discussion assignments account for 25% of your overall grade.

Accommodations & Student Letter of Accommodation requests

To determine appropriate accommodations SDS engages in an individualized inquiry that balances the needs of the student and the academic objectives of the course or program. Instructors are not required to provide accommodations until the student has presented a Letter of Accommodation (LOA) for information about how to respond to requests for accommodations visit our Information for Instructors webpage. Please let SDS know if you have questions or need clarification. All students who have completed their SDS initial meeting will qualify for priority course registration. University of Iowa. (n.d.). *Accommodations*. Student Disability Services. <https://sds.provost.uiowa.edu/accommodations>

Student Disability Services (SDS) determines student eligibility for accommodations. To be eligible for accommodations students must submit an application and documentation of a disability from an appropriately licensed professional. Eligible students then meet with an SDS Access Consultant to discuss the academic accommodations necessary to afford the student an equal opportunity to participate in the student's courses. These accommodations are documented in a Letter of Accommodation (LOA). The Letter of Accommodation (LOA) is a document that informs instructors that a student has a documented disability and is deemed eligible for specific academic accommodations. The information in the letter is confidential and should be treated as such. Students must share the LOA with the instructor to receive accommodations for the instructor's course. Instructors can view Letters of Accommodation via MAUI in ICON. Students and instructors should engage in an interactive process to determine how the accommodations will be provided in the instructor's course. Student Disability Services staff are available to provide consultations. We encourage all faculty, staff and students to contact us should questions or concerns arise. (Student Disability Services, n.d.). University of Iowa. (n.d.). Student Letter of Accommodation requests. Student Disability Services. <https://sds.provost.uiowa.edu/instructors>

For more information, please visit the links below.

- Accommodations: <https://sds.provost.uiowa.edu/accommodations>
- Information for Students: <https://sds.provost.uiowa.edu/students>
- Student Letter of Accommodation requests: <https://sds.provost.uiowa.edu/instructors>

Grade Scale & Evaluation

Your grade in this course will be based on the following:

A: 100-92%,	A-: 91-88%	B+: 87-84%	B: 83-80%,
B-: 79-76%	C: 75-70%	D: 69-60%	F: 59-0%

Assignment/Activities Percentage

Open discussion assignments	25%
Responses to your peers	25%

Midterm report	25%
Final report 1 (Final report)	15%
Final report 2 (Analysis document)	10%
Total	100%

The weekly assignments evaluation

The weekly assignments (open discussion assignments & responses to your peers) will be graded based on the following rubrics. Note that suggested word length for each assignment is just a rough estimate, so there is no impacts on the your final grading, as long as your submissions are satisfactory in light of the rubric. For a one-day late submission, your scores will be 80% deducted from the normal grading. More than one-day delay will not be accepted, except from the case of personal emergencies. For each assignment, submission deadline is at 11:59 pm on Sundays.

Rubric for the open discussion assignments

5	The post clearly addresses the assignment prompt with supporting reasons.
4	The post addresses the assignment prompt with reasons.
3	The post is a bit off-topic and/or supporting reasons are less related the main point.
2	The post is off-topic and/or no supporting reasons can be seen.
1	The post is unrelated to the prompt.
0	No post.

Rubric for peer responses

5	At least one constructive and critical response to your peer is done.
4	At least one constructive or critical response to your peer is done.
3	At least one agreement can be seen with related comments
2	At least one agreement can be seen, but no constructive or critical elements.
1	1 The response is unrelated to the main post.
0	No post.

Midterm report & Final Project

Refer to the Academic Writing 101 Course Weekly Schedule & Details below.

The Use of Artificial Intelligence (AI)

In accordance with the [recommendation](#) that instructors should provide a clear guidance about the use of AI (University of Iowa, n.d.), this syllabus articulates the course policy for AI use. Except from the cases where the use of AI is instructed or encouraged, all written works should be done by a student or collaborations of students. That being said, appropriate and ethical uses of Artificial Intelligence (AI) as a supporting tool can have the potential to improve your writing skills and writing process, ultimately augmenting your intellectual activities. Perhaps, the future standard of academic writing may be a collaboration of a human writer and AI. Given this, this course has a content and assignments that instruct students to use AI. In such a case, the use of Microsoft 365 Copilot is encouraged. Even if you did not use AI tools, questionable writing practices, such as hallucinations of previous study (citing previous study that does not exist) or unnecessary, frequent use of asterisks (but not limited to them) will be regarded as academic misconduct.

For more information, website of Information Technology Services is helpful.

- Information Technology Services Copilot Chat: <https://its.uiowa.edu/copilot>
- Information Technology Services Generative AI: <https://its.uiowa.edu/ai>

Email

University Email (e.g., ryota-numao@uiowa.edu) is the official communication method for this course. Students are expected to check their university email account on a daily basis.

Useful Resources for Writing (as needed)

We do not touch on these materials, but use them as needed

- [Academic Collocation List from Pearson.pdf](#)
- [Academic Phrasebank](#)
- [The Writing Center at University of Iowa](#)
- [Search the UI Libraries resources](#)

Academic Writing 101

Course Weekly Schedule & Details

Week 1

Topic: Course overview & Introduction to academic writing

Objective: To understand the course and importance of academic writing

Content: Course overview, the need of collegiate-level academic writing, and academic integrity: plagiarism

Videos:

- [7 Features of Academic Writing](#)

- [Academic Style](#)
- [Academic Writing Style](#)

Required reading:

For students whose first language is English:

- Bailey (2021). p.1-7. & p.46-51.

For students whose first language is not English:

- Bailey (2017).

Part 1. The Writing Process 1.1 Basics of Writing From “The purpose of academic writing” to “Simple and longer sentences” & Part 1. 1.4 “Avoiding Plagiarism”

Assignment:

Post your self-introduction (such as your name, would-be major, hobby, hometown, personal focus in this course, and something about you) and impressions on collegiate-level academic writing (You may compare writing in high school with that of in college). (Suggested length: 150-200 words in total) Then, respond to a post from other students.

Weekly Quiz

Week 2

Topic: Identifying your audience & Planning for writing

Objective: To understand the necessary steps before writing

Content: The importance of readership and outlining for writing

Video:

- [Audience Analysis](#)
- [Dynalist: Text Outliner](#)
- [Curse of Knowledge](#)

Required reading:

For students whose first language is English:

- Bailey (2021). p.11-17.
- Hayot (2014). p.36-40. (Four: Institutional Contexts)

For students whose first language is not English:

- Bailey (2017). Part 1. The Writing Process 1.5 From Understanding Essay Titles to

Planning (From “The planning process” to “Writing outlines”)

- Hayot (2014). p.36-40. (Four: Institutional Contexts)

Assignment: Audience Analysis

Post your analysis on the audience (readership) of your report from other coursework. At this point if you do not have any reports, you may look ahead to midterm or final papers. Your analysis should include a brief description of the subject, its instruction, purpose for writing,

audience (readership), their background knowledge, and what you have to pay attention to based on your analysis (Suggested length: 150-200 words in total). Then, respond to a post from other students.

Weekly Quiz

Optional Reading:

- [The curse of knowledge by Pinker](#)
 - Excerpt from The Sense of Style By Pinker
-

Week 3

Topic: Gathering information for writing

Objective: To understand information resources that support your writing

Content: University Library resources, University Writing Center, Google Scholar Tutorial, and resource credibility

[Attention] Synchronous session: Wednesday 1:00-1:30pm

This week, we will invite a librarian from the UIowa library to learn useful resources for writing. Participation in this synchronous session is required for all the students. However, if you have a timetable conflict with other class, you may watch the recorded video afterward. Zoom link will be attached from ICON.

Time: Wednesday 1:00-1:30pm

Videos:

- [Tutorials: Library Tools](#)
- [Tour the Main Library at the University of Iowa](#)
- [How to Use Google Scholar for Academic Research](#)
- [Evaluating Sources for Credibility](#)
- [Is Wikipedia a Credible Source?](#)

Required reading:

For students whose first language is English:

- Bailey (2021). p.19-27.

For students whose first language is not English:

- Bailey (2017). Part 1. The Writing Process 1.2 Reading: Finding Suitable Sources
(From “Academic texts” to “Using library websites to search electronic resources”)

Open discussion assignment: Find a research engine

Search and find one academic paper database or research engine relevant to your (would-be) major. Then, post your opinion about what you think is useful for your future study (Suggested length: 50-100 words). Databases or research platforms can include PubMed, ScienceDirect, Web of

Science, frontiers, nature, WILEY Online Library, PLOS One, Sage Journals (but not limited to them). The purpose here is to find available information resources for you.

Weekly Quiz

Week 4

Topic: Reading for writing

Objective: To be able to read textbooks and papers for the purpose of writing.

Content: How to read for writing

Videos:

- [How To Read Research Papers Effectively](#)
- [THIS Academic Reading Method Will Save You THOUSANDS Of Hours](#)
- [Is there a reproducibility crisis in science?](#)
- [Why You Shouldn't Always Trust Science](#)
- [Not all scientific studies are created equal](#)

Required reading:

For students whose first language is English:

- Bailey (2021). p.31-44.

For students whose first language is not English:

- Bailey (2017). 1.3 Reading: Developing Critical Approaches 1.6 Finding Key Points and Note-making 1.7 Summarising and Paraphrasing

Open discussion assignment:

Based on what you have learned so far, post your current strategies for reading a paper (Suggested length: 150-200 words in total). You do not have to exactly follow what you learned. Then, respond to a post from other students.

Weekly Quiz

Optional reading:

- [How to read a paper](#)
 - [How to Read a Scientific Article](#)
-

Week 5

Topic: The importance of argument

Objective: To understand the importance of argument and how to develop it

Content: Argument

Videos:

- [Argumentation in Academic Writing](#)
- [Argumentation in Academic Writing, part II](#)
- [How to actually use paragraph writing](#)

Required reading:

- [Crafting arguments in academic writing](#)

Open discussion assignment: Argument analysis

Post your analysis on what Baber (2018)'s main argument is and how it is supported. (Suggested length: 150-200 words in total). Then, respond to a post from other students.

Weekly Quiz

Week 6

Topic: Paragraph writing as a thinking tool

Objective: To understand the notion of paragraph writing and use it as a tool

Content: Leap in logic & demonstration, Supporting Sentences, Concluding Sentence

Videos:

- [How to write an academic paragraph](#)
- [4 Types of Paragraphs](#)

Required reading:

For students whose first language is English:

- Bailey (2021). p.83-88.
- Hayot (2014). p.102-106. (Thirteen Paragraphing 102)

For students whose first language is not English:

- Bailey (2017). Part 1. The Writing Process 1.10 Organising Paragraphs (From "Paragraph structure" to "Practice D")
- Hayot (2014). p.102-106. (Thirteen Paragraphing 102)

Open discussion assignment: Paragraph analysis

Categorize each passage below into different types of roles (e.g., definition, comparison, example, problem etc.). Note that there may be no single correct answer.

Passage A.

A microscope is an optical instrument with which the apparent size of an object can be enhanced. A simple microscope consists of a double convex lens and a magnifying glass. A compound microscope, on the other hand, will contain more than one of each of these lenses, which are situated at the ends of a cylinder.

Passage B.

The question of ecosystem stability is complicated, however. The first problem is that ecologists do not all agree what “stability” means. Stability can be defined as simply lack of change. In that case, the climax community would be considered the most stable, since, by definition, it changes the least over time. Alternatively, stability can be defined as the speed with which an ecosystem returns to a particular form following a major disturbance, such as a fire. This kind of stability is also called resilience. In that case, climax communities would be the most fragile and the least stable, since they can require hundreds of years to return to the climax state. The question of ecosystem stability is complicated, however. The first problem is that ecologists do not all agree what “stability” means. Stability can be defined as simply lack of change. In that case, the climax community would be considered the most stable, since, by definition, it changes the least over time. Alternatively, stability can be defined as the speed with which an ecosystem returns to a particular form following a major disturbance, such as a fire. This kind of stability is also called resilience. In that case, climax communities would be the most fragile and the least stable, since they can require hundreds of years to return to the climax state.

Passage C.

These three explanations of infantile amnesia are not mutually exclusive; indeed, they support each other. Physiological immaturity may be part of why infants and toddlers do not form extremely enduring memories, even when they hear stories that promote such remembering in preschoolers. Hearing the stories may lead preschoolers to encode aspects of events that allow them to form memories they can access as adults. Conversely, improved encoding of what they hear may help them better understand and remember stories and thus make the stories more useful for remembering future events. Thus, all three explanations— physiological maturation, hearing and producing stories about past events, and improved encoding of key aspects of events—seem likely to be involved in overcoming infantile amnesia.

Passage D.

Behaviorism and cognitivism offer two distinct lenses for understanding human learning. Behaviorism views the mind as a "black box," focusing exclusively on observable behaviors and environmental stimuli. It suggests that learning is a process of conditioning, where responses are shaped by reinforcements or punishments. To a behaviorist, if you can't see it, it's not part of the data. Cognitivism, by contrast, focuses on the internal mental processes that behaviorism ignores. It likens the human mind to a computer processor, emphasizing how we receive, organize, store, and retrieve information. Here, learning is seen as an active change in mental schemas rather than just a reaction to external cues. While behaviorism explains what we do, cognitivism explains how we think

Passage E.

Perspective is a technique in art that is used to represent three-dimensional objects and depth relationships on a flat surface. Modern linear perspective (which involves making objects seem smaller the more distant they are from the observer) was probably first used in the 1400s by the artist Masaccio and the architects Filippo Brunelleschi and Leon Battista Alberti in Florence, Italy. Before this time, artists paid little attention to realistic perspective. In recent decades, many modern artists have returned to the practices of early artists and have abandoned realistic perspective.

Optional reading:

- [Paragraphing in English Articles: Tips for Non-Anglophone Authors](#)

- [Paragraph Types](#)
-

Week 7

Topic: Paragraph analysis

Objective: To understand and analyze many structures of paragraph

Videos:

- [Uneven U](#)

Required reading:

- Hayot (2014). p.59-73. (Eight: The Uneven U)
- Hayot (2014). p.102-115. (Thirteen: Paragraphing)

Open discussion assignment: Paragraph analysis

The actual questions will be presented in ICON.

Week 8

Topic: Writing a conclusion

Objective: To understand how good paragraphs are structured

Videos:

[How to Write a Conclusion Paragraph](#)

Required reading:

For students whose first language is English:

- Hayot (2014). p.130-139. (Seventeen: Ending Well)
- Bailey (2017). p.93-94.

For students whose first language is not English:

- Hayot (2014). p.130-139. (Seventeen: Ending Well)
- Bailey (2021). 1.11 (Conclusions / Conclusion structure / Practice)

Assignment: None. Focus on your midterm report.

Week 9: No class. Reflect your learning so far.

Week 8 - 9: Midterm report (25% of the final grading)

Midterm report Instruction:

Write a report about a subject or class that you have taken so far and found intellectually stimulating in university.

- Have an argument for the topic. Your argument here should be “[The subject or class you took] is intellectually stimulating” (Your choice does not have impacts on the final grading).
- Organize your report with introduction, body, and conclusion.
- Suggested length: 1000-1200 words (excluding references)
- Format: 1 inch margin, font: Times NewRoman, letter size:12
- References: follow the APA 7th format

(Family name, Initial of first name., & Family name, Initial of first name. (Year). Title. *Name of the Journal*, number(issue), page-page.)

- Format for submission: PDF file
- Cite at least 2 related articles or textbooks with appropriate citation format.

Rubric

	10	9	8	7	6
Topic	On-topic	Nearly on-topic	Less on-topic	Almost off-topic	Off-topic
Argument	Have a clear argument	Have an argument	Have a less clear argument	Have a vague argument	No argument
Support with citation	Strong support for your argument	Support for your argument	Less support for your argument	Vague support for your argument	No support for your argument
Organization	Introduction, body, and conclusion.	One of the parts is unclear	Lacking one of them	Lacking two	No organization
Formatting	Follows the instructions	Less than 3 mistakes	Less than 6 mistakes	7-10 mistakes	More than 11 mistakes
Grammar / Spelling	Less than 3 mistakes	Less than 6 mistakes	7-10 mistakes	11-15 mistakes	More than 16 mistakes

Week 10

Topic: Writing as a collaboration

Objective: To be able to write with peers

Videos:

- [5 tips for critical thinking](#)
- [Proofreading: catch more errors](#)
- [Critical Reading](#)
- [5 Tips to Improve Your Proofreading](#)

Required Reading:

- [Critical Reading Toward Critical Writing](#)

Assignment 1: Collaborative writing (Feedback)

Post your Midterm Report in the form of Google document Links to an external site. here. Then, give your peer some feedback by using "comment". Each student is expected to make at least 15 comments for feedback. Though I do not pose strict constraints, around half of the comments should be positive, and the rest should be critical (Please avoid 100% praising or 100% criticizing your peer). Your feedback can be about grammar, vocabulary, paragraph structure, argument, overall structure, typos, etc (but not limited to them). Do not forget to share your Google Docs by sharing permissions as "Commenter".

Note

- Commenters should not criticize the writer oneself but the paper itself with rationales.
- Receivers should detach the comments from yourself. Praises and criticism are not for "the writer", but for "the paper the writer has written".
- Your feedback should be independently done from your personal preferences for the argument. Rather, try to focus on the logic, validity, reliability, and plausibility.
- For students who do not know how to use "comment", see the following video: Google Docs: how to add comments, step by stepLinks to an external site.
- For students who do not know how to use "comment", see the following video: Google Docs: how to add comments, step by step

Assignment 2: Resubmit your revised Midterm Report after receiving peer-feedback.

Note

- You do not have to reflect every aspect of the feedback.
- Even if you reflect all the peer-feedback with impaired-quality writing, you will receive lower score for the assignment.
- The score for this assignment will be given for the improvement in writing quality. The point here is to practice picking other's brain to polish your writing regardless of whether you adopt it or not.
- Highlight revised sentences with a color.

Rubric

5	Submission reflects some peer-feedback with improved writing quality.
4	Submission reflects some peer-feedback with slightly improved writing quality.
3	Submission reflects some peer-feedback with the same writing quality.
2	Almost no revision can be observed without valid reasons.
1	No revision can be observed without valid reasons.
0	No submission.

Optional Reading:

- [Tools for Critical Reading](#)
-

Week 11

Topic: Ethical use of AI in writing

Objective: To understand the responsible and ethical use of AI in academic writing

Videos:

- [How artificial intelligence is reshaping college for students and professors](#)
- [Large Language Models explained briefly](#)
- [How to use ChatGPT and other AI tools as a college student](#)
- [The three big ethical concerns with artificial intelligence](#)

Required reading:

- [Artificial intelligence-assisted academic writing: recommendations for ethical use](#)
- [University of Iowa Artificial Intelligence Strategy and Guiding Principles](#)

Open discussion assignment:

Post one unethical or irresponsible use of AI in college writing and indicate the problem(s). Cite at least 1 source from this week's materials. You may include a solution to the problematic use of AI (Suggested length: 200-300 words). Then, respond to a post from other students. (You must not use AI for this assignment!)

Week 12

Topic: AI as a supporting tool in writing

Objective: To understand the role of AI as a supporting tool in academic writing

Videos:

- [A Student Guide for AI in College Writing \(2min\)](#)
- [The AI Dilemma](#)
- [AI Writing Techniques](#)
- [AI Modeling](#)
- [The AI Future](#)

Required reading:

- [Artificial intelligence in academic writing: a paradigm-shifting technological advance](#)

Optional reading:

- [Using artificial intelligence in academic writing and research](#)

Assignment:

Post your opinion about the use of AI in college writing. Cite at least 1 source from this week's materials. (Suggested length: 150-250 words) Then, respond to a post from other students. (You must not use AI for this assignment!)

Week 13

Topic: Understand the standard of your major field

Objective: To understand the standard of your major field 1

Materials: An academic paper you want to read.

Assignment:

Select and read an academic paper you want to read, and post your findings about the standard of your major field. Your findings can include things such as the length and structure of the paper, type of citation format (but not limited to them). In your post, you should also include the citation of the paper you have read.

Week 14

Topic: Final report-1

Objective: 1. To apply what you learned so far to the final report.

2. To analyze the report structure and confirm it.

Materials: No Learning Materials. Focus on the Final Report.

Assignment: There are two assignments for the final report.

1. Main report Instruction:

Write an academic report about the use of AI in your (would-be) major.

- Have an argument for or against the use of AI in your (would-be) major and support it by citing articles. (Your stance does not have impacts on the final grading.)
- Organize your report with introduction, body, and conclusion.
- Suggested length: 1000-1200 words (excluding references)
- Format: 1 inch margin, font: Times NewRoman, letter size:12
- References (Bibliography): follow the standard of your major field (e.g., APA, Chicago, Harvard, IEEE, MLA, etc.).
- Format for submission: PDF file
- Cite at least 3 related articles or textbooks with appropriate citation format

Rubric

	10	9	8	7	6
Topic	On-topic	Nearly on-topic	Less on-topic	Almost off-topic	Off-topic
Argument	Have a clear argument	Have an argument	Have a less clear argument	Have a vague argument	No argument
Support with citation	Strong support for your argument	Support for your argument	Less support for your argument	Vague support for your argument	No support for your argument
Organization	Introduction, body, and conclusion.	One of the parts is unclear	Lacking one of them	Lacking two	No organization
Formatting	Follows the instructions	Less than 3 mistakes	Less than 6 mistakes	7-10 mistakes	More than 11 mistakes
Grammar / Spelling	Less than 3 mistakes	Less than 6 mistakes	7-10 mistakes	11-15 mistakes	More than 16 mistakes

2. Analysis document (10% of the final grading)

Analyze the structure of your “main report.”

- By using the comment function of Microsoft Word, describe the roles/intentions of at least 15 sentences. You do not have to write a coherent report with paragraphs for this task.
- Format for submission: Word file

Rubric

5	At least 15 comments can be seen, with the recommended ratio of positive and critical. Most of the comments are intended to improve the writing quality.
4	10-14 comments can be seen, with the recommended ratio of positive and critical. Most of the comments are intended to improve the writing quality.
3	6-9 comments can be seen. Most of the comments are intended to improve the writing quality.
2	Less than 5 comments, or A few comments help improve the writing quality.
1	Feedback gives either praises or criticism only.
0	No feedback.

Week 15

Topic: Final report-2 (Peer Feedback → Revise → Resubmission)

- Objective: 1. To be constructively critical to other's writings.
2. To complete your final report based on peer feedback.

Materials: No Learning Materials. Focus on the Final Report.

Assignment:

1. Peer Feedback for Final Report

Post your [Main report](#) in the form of Google document here. Then, give your peers some feedback by using "comment". Each student is expected to make at least 15 comments for feedback. Though I do not pose strict constraints, around half of the comments should be positive, and the rest should be critical (Please avoid 100% praising or 100% criticizing your peer). Your feedback can be about grammar, vocabulary, paragraph structure, argument, overall structure, typos, etc (but not limited to them). **Do not forget to share your Google Docs by sharing permissions as "Commenter".**

Note

- Commenters should not criticize the writer oneself but the paper itself with rationales.
- Receivers should detach the comments from yourself. Praises and criticism are not for "the writer", but for "the paper the writer has written".
- Your feedback should be independently done from your personal preferences for the argument. Rather, try to focus on the logic, validity, reliability, and plausibility.

2. Final submission of Final report

Resubmit your revised Final Report here. You may use Copilot for revision. However, you should not use Copilot to write the paper from scratch. Use AI as a supporting tool for writing, not as a replacement of you.

Note

- You do not have to reflect every aspect of the feedback.
- Even if you reflect all the peer-feedback with impaired-quality writing, you will receive a lower score for the assignment.
- The score for this assignment will be given for the improvement in writing quality. The point here is to practice picking other's brain to polish your writing regardless of whether you adopt it or not.
- Highlight revised sentences with a color.

Rubric

5	Submission reflects some peer-feedback with improved writing quality.
4	Submission reflects some peer-feedback with slightly improved writing quality.
3	Submission reflects some peer-feedback with the same writing quality.
2	Almost no revision can be observed without valid reasons.
1	No revision can be observed without valid reasons.
0	No submission.
